Call for Papers: Workshop Multimedia Semantics - The Role of Metadata
====================================================================

DEADLINE EXTENDED!

6th Workshop of the Multimedia Metadata Community, BTW 2007

5.-9. March 2007, Aachen

The web 2.0 will be a multimedia web. In order to make multimedia services ubiquitous, accessible and interoperable we need new mechanisms to describe and process the semantics of multimedia artefacts on the web. Metadata, mostly linguistic data about multimedia artefacts, will play an important role in these mechanisms.

The overall objective of the workshop is to investigate the current practice of multimedia metadata for contextualized ubiquitous, accessible and interoperable services on a higher semantic level, e.g. in collaborative working environments. We concentrate on the development of services and test beds for MPEG-7 and MPEG-21 based services, but also contributions related to other multimedia metadata description standards are welcome. The majority of multimedia metadata description standards in use is based on XML. This has important consequences on the development of services and test beds on the database, the infrastructure and the interface level. We are encouraging especially contributions from interested research groups from the database, the web service and the web 2.0 area.

This is the 6th Workshop of the Multimedia Metadata Community (http://www.multimedia-metadata.info). We want to extend this very active and successful community with new members.

Important Dates:

- January, 15, 2007 Paper submission
- January, 29, 2007 Notification of Authors
- February, 14, 2007 Final papers
- March, 5-6, 2007 Workshop on the BTW 07

Topics of the workshop are listed here but not limited to

- Multimedia Semantics
- Metadata Crosswalks
- Metadata Interoperability
- Multimedia Metadata
- Attention Metadata
- XML Databases for Metadata Management
- Metadata based Web Services
- Model Management
- Emergent Semantics
- Multimedia Authoring
- Multimedia Databases
- Multimedia Retrieval
- Personalizing Multimedia Content
- Cross-media Clustering
- Mobile Multimedia
- Multimedia Programming
- Web 2.0
Submission & Contact

Submissions can be in German or English. All submissions will be reviewed for relevance, originality, significance, soundness and clarity by three reviewers. The page limit is 20 pages for full papers, 10 pages for short papers. The submissions should follow the LNI format specification (see http://tinyurl.com/y48b6a).

The proceedings will be published within the Proceedings Band "Aachener Informatik Berichte". Selected workshop papers will be invited for a special issue of the Journal of Universal Knowledge Management (JUKM, http://www.jukm.org).

To submit a paper please use the Chairhelper (http://www.know-center.tugraz.at/chairhelper/btw07/submission-contact.jsp) online submission system for the Workshop. Further questions regarding the workshop and the submission should be directed to wms07@multimedia-metadata.info

Workshop Chairs

Ralf Klamma, RWTH Aachen University
Harald Kosch, University of Passau
Michael Granitzer, Know-Center, Graz

Program Committee (preliminary)

Werner Bailer, Joanneum Research, Graz, Austria
Susanne Boll, University of Oldenburg, Germany
Richard Cheibr, LE2I Laboratory (UMR - CNRS) - Bourgogne University, France
Mario Doeller, Passau University, Germany
Jost Enderle, RWTH Aachen University, Germany
Victor Manuel Garcia-Barrios, University of Technology Graz, Austria
Christian Gtl, University of Technology Graz, Austria
Werner Klieber, Know-Center Graz, Austria
Klaus Lepold, Klagenfurt University, Austria
Mathias Lux, Klagenfurt University, Austria
Sven Meyer zu Eissen, University of Weimar, Weimar, Germany
Vincent Charvillat, ENSEEIHT, France
Vincent Oria, NJIT, USA
Peter Schallauer, Joanneum Research, Graz, Austria
Vedran Sabol, Know-Center Graz, Austria
Marc Spaniol, RWTH Aachen, Aachen, Germany
Benno Stein, University of Weimar, Weimar, Germany
Georg Thallinger, Joanneum Research, Graz, Austria
Christian Timmerer, Klagenfurt University, Austria
Ingo Wolf, T-Systems, Germany
Martin Wolpers, KU Leuven, Belgium
